

Standard Letter

Thank you for your inquiry about Tin Ceilings. We ship across Canada and the USA daily. Special prices on large orders. Call for more information.

Panels, Moldings, Fillers and Cornices

Our panels are 2' x 2' making them easy for one person to work with, and quick to install. The panels are tin plated steel and are easily painted any colour. In addition, you can have the panels plated in bright or antique copper, bright or antique brass, chrome, pewter or gold finishes. Cornices, moldings and fillers are 4' long with "safety hems". A safety hem is metal that is bent over to make a nice smooth edge, to give it a finished look and also make it comfortable to handle.

Custom Items

We can match your existing panels with custom made panels. We also have new and old panels not shown on our website or in our brochure. It would be best to send pictures along with size and amount required for a quote. Custom orders of any design and size are offered and are quoted on the amount required.

Installation

Panels are usually nailed up, but can be cut to fit into a t-bar as well as a drop ceiling. They can also be stepped down or fastened underneath to hide the t-bar. Panels can also be cut to fit backsplash areas.

Order Information

Your order is quoted on total materials, including packaging and shipping to your door. Orders can be placed by phone or fax or e-mail. Delivery time for bright tin panels, moldings, fillers and cornices, is approximately 1 week. Custom painted or plated orders take approximately 2 – 4 weeks. Orders can be sent C.O.D., but require a small deposit, and all shipping information. Shipping costs are quoted on the amount required and the total weight. We require full shipping addresses to quote.

Again, thank you for your interest. Looking forward to your decision.

Sincerely,

Brian Greer
